ASTR 2910: Mid-course review

In celebration of making it to the halfway point of the semester, I'd like to solicit your feedback on how ASTR 2910 is going so far. Based on your responses, I may adjust certain aspects of the course to improve your experience going forward.

This form is completely anonymous, and all questions are optional. However, the more feedback I have, the better I can make the course -- so please fill out as much of the survey as you can! Bullet points and incomplete sentences are fine and encouraged.

Thanks!

1. How do you feel about the pace of the course?

   Mark only one oval.

   ◯ Too fast

   ◯ Just right

   ◯ Too slow

2. What about the course has been the most useful or interesting?

   _____

   _____

   _____

   _____

   _____

3. What about the course has been the most challenging?

   _____

   _____

   _____

   _____

   _____

4. Is there anything I can change about the way I teach or run the course that would make the experience better for you?

_____

_____

_____

_____

_____

5. How interested would you be in sessions covering the following topics?

Mark only one oval per row.

	Not interested	Somewhat interested	Very interested
Review of Python concepts	◯	◯	◯
"Day in the life" of a PhD student	◯	◯	◯
Taking a gap year	◯	◯	◯

6. Please suggest any other topics you'd want to see covered in the second half of the course.
